Good afternoon,

I wanted to follow-up from our meeting on Sept. 14<sup>th</sup>.

As we discussed, the BLM's next steps are:

- To let us know when they are ready to have a small group work with the ranchers to help them understand the policy and see if it addresses their concerns.
- To provide us with added language to the policy to address compliance.

NMOGA will be working on language to clarify number of large diameter lines allowed in same route.

NMOGA expressed the need to get this done sooner than later as operators are wanting to utilize the policy for treated produced water temporary lines. BLM, also, committed to work on an interim process for treated produced water lines.

Please let me know if you need any additional information.

Sincerely,

*Yolanda Perez*
